- 1. The hemp extract is the product of a batch tested by the independent testing laboratory;
- 2. The batch contained a total delta-9-tetrahydrocannabinol concentration that did not exceed 0.3 percent pursuant to the testing of random sample of the batch; and
- 3. The batch does not contain contaminants unsafe for human consumption.<sup>+</sup>

Comments

Reported results and measurements are based off of a calculated hypothetical weight using the ratio between filling weight and total capsule weight as per client instruction. Only the filling material was tested. The reported result for delta-9 THC represents the quantitation of a peak that elutes in the retention time window of the delta-9 THC certified reference standard. However, it is inconclusive due to the interference of an unknown compound. LC-MS/MS analysis is recommended for a more conclusive identification and quantitation. This result of this sample is confirmed with a retest.
